You will find the download link at this link: ... Read more in the article Download free car repair software At the end of this stage, depending on the complexity, several layers of putty, primer are applied to the body, and then the car is painted with paint guns. After the paint layer dries, another layer of paint is applied. Depending on the method of surface preparation, a car body is covered with several layers of filler, primer, and then the spray guns are used to paint the car. Once the paint layer is dry, another layer of paint or mother-of-pearl is applied Depending on the degree of surface preparation, several layers of filler and primer are applied and then the car is sprayed with paint guns. After a layer of paint dries, another layer of paint is applied Handprints on the body of a car occur during use, so there may be a reason to remove them. To get rid of them with After cleaning the body of bitumen, you can remove the fingerprints, or you can wax and polish the car. But if fingerprints are left on your car, it's a good idea to get rid of them. You can remove fingerprints or wax and polish a car after cleaning the body of bitumen. But if fingerprints remain on the How do I remove fingerprints after painting my car? But if fingerprints remain on your fingers, you need to wash them off with a soapy solution, which can be neutralized with a solution of vinegar. How to remove fingerprints? There are two options How to clean hands from the paint? How to remove paint marks? But this does not mean that the stain can simply be erased. If the trace is left on the painted surface, you will not be able to remove it without much difficulty. There are two options for its removal: washing off the paint with a solvent or removing the stain with detergents. Let's consider all the options in more detail. 1. Paint removal with solvent To remove paint from a surface that cannot be cleaned with water, it is recommended to use solvents. Such materials include: acetone, white spirit or gasoline. To remove paint with solvent, follow the instructions: 1. Apply a small amount of solvent to a cotton pad and gently wipe the stain. 2. If necessary, reapply solvent and wipe clean. 3. Allow the solvent to soak into the stain for several minutes, then use a soft, clean cloth to remove any residue. 4. To remove paint from delicate fabrics and textiles, use special non-aggressive solvents to clean stains before dd2bc28256
