AutoCAD Download (April-2022)

Contents Installation The installation process is relatively easy, but requires a computer running Windows XP, Vista, Windows 7, or Windows 8. If you have a Mac, look at Apple's installation instructions.[1] It can be downloaded from Autodesk.

Configuration After installing AutoCAD, you'll be given the chance to configure some of the settings and preferences. First, you'll be prompted to agree to the license terms. If you already have an active Autodesk Design Suite license, you can click "skip this step" and continue. If you do not have a Design Suite license, you'll be asked for the CAD subscription code for your license. You can purchase a Design Suite subscription at CADTutor. The CADTutor code is what you'll need to enter when you restart AutoCAD.[2] In the following example, we will be using the CADTutor code. If you would like to purchase a Design Suite, go to CADTutor for the right code. Step 1. Click "Enter CADTutor Code" to get the code. Step 2. Paste the code into the box and click "Get Code" to proceed. Step 3. Click "Submit" to continue. Note that, in the above screenshot, we will be using the trial version of AutoCAD. If you're using a paid version of AutoCAD, the subscription code will be different. If you don't know which version you have, open the Help menu and look for a "Product Information" option. **Getting help** Depending on the version of AutoCAD you have, you will have several options to get help. By default, AutoCAD will show the help menu and its options.[3] In the following example, we will be using the basic help option. This screenshot shows the help menu. Step 1. Click the help menu. Step 2. Click "AutoCAD Help." You can also use the search command (Ctrl+F) to find help topics. For example, if you wanted to know how to turn off the grid: Step 1. Press Ctrl+F to open the search box. Step 2. Type "off grid." You will find all related topics at the top of the search results. Click a result to get information on that topic. **Getting a model AutoCAD**
