Contacts Hub

Contacts Hub is a Windows application that helps to remember and manage

contacts, connect them to different social networks, and synchronize them with your mobile devices, tablets, and notebooks. It also features an elegant interface and a useful user-friendly app. Thanks to this utility, you can collect information about your contacts, including their social profiles, contact information, and more. Add contacts, link accounts Once you open the Contacts Hub application, it allows you to view different information about your contacts. It lets you add, delete, edit, synchronize, and export contacts. You can link your contacts to different social networks, like Facebook, LinkedIn, Twitter, YouTube, and various communication platforms, like Skype, Viber, Yahoo, and Line. Recording the essentials As already mentioned, Contacts Hub has two categories: friends and family. Moreover, it comes with a free of charge premium option, that can be used to create your own subgroups and additional groups. It's possible to set up one of the two initial groups with a click, which can be used for different needs. By default, the app uses the default name "My contacts", but you can modify it, depending on your preferences. Moreover, if you want to edit the main group, select the corresponding section and click the edit button, for a quick access to details. Fill in relevant details about each individual and share them You can quickly add new contacts by typing a name, email address, phone number, company, etc. or choose to import a list of contacts from your PC. All you need to do is select one of the predefined themes, click the install button, and wait for the tool to do its thing. To add more information, you can add various data, such as the persons' profile, interests, and birthdays, along with the privacy settings, among other characteristics. In addition, you can also upload contact photos or grab an image from the built-in camera. After filling in all the details, select the corresponding section and click the save button. Download and share a contact to VCF or TXT files In order to share a single contact with other people, use the built-in share button. This way, you can choose a file format to download and share. In addition to the previously mentioned options, the app can automatically sync contacts to other devices, including PCs, tablets, and mobile phones. Plus, you can easily save the files to your OneDrive account. 1d6a3396d6

Contacts Hub Crack With License Code For PC
