

Convert DLL To C Code Online !!BETTER!!

February 17, 2009 - 2. Copy the existing C# code into the newly created .cs file within the project. 3. Compile. 4. Link to the .dll in the bin directory. 5. Include the DLL in the project file (Project => Module). 6. When compiling the project, you can use the DllImport command. 7. Dependencies will be imported automatically. 8. Place the .dll file in Program Files. 9. Delete the project file (Project => Projects) and then rebuild it. 10. Add a project file (Project => Projects) to the Solution Explorer window using the Add/Remove Files menu item. When this happens, it's safe to say that your DLLs have been successfully compiled.
