Version 3.1 of the popular free graphics design and printing software program (PhotoGrav) has been released today. The developers of PhotoGrav have announced that they had fixed a long-standing graphic issue affecting their design and print functionality. It's a year since I first gave PhotoGrav a try. Two years ago, I had been using PencilCode 3.0 (the first version of PhotoGrav that you see on the list below) for a good 20 or 30. In this list, you'll find a collection of free tools and software for Windows, Linux, and macOS that can be used to create PDF, images, videos, music, spreadsheets, documents, animations, and more. I'm not always looking for new programs, but that doesn't mean that I won't admit it when I find something that's worth mentioning. If you're looking for some software for writing or editing PDFs, you should be able to find something on this
