Everybody remembers their first girlfriend. Me, it was her, her hair, and her cheap perfume. I knew she was going to be the one, ever since we met; a bright, fun young thing, eager to meet new people and go new places. Even standing outside at our first date I could feel my heart thumping in anticipation. Nothing good will ever last that long! I'm not a proud man, but some men might call me a simple man, very simple, with a mind that's not overworked, I don't travel around, and I don't aspire to anything grandiose. Nothing much to see around here, so I often find myself here, round these rooms.

Over the years, I must have taken part in quite a few rituals that either failed or succeeded. But, I do remember this one ritual, it lasted six hours, and another ritual lasted two hours, and the other, I guess it was a bit slower, but, none of them will ever leave a deep impression on my memory, but this ritual, I'll never forget it. I don't remember her name. All I remember was how I felt, that pang of sadness in my heart, how she smiled and told me "You are the one, Jim." That is something that stuck in my memory like a catchy song. She was...blue.

Wild Force & Mines 3.2.0.0 - Games/Action... Wild Force & Mines is a strategy game set in a post-apocalyptic environment. Destroy all enemy outposts and clear out enemy bases to gain control of the land. Xcross Miner & Rover is a 3D, action, open world mining simulator for PC. The game is set in a huge, procedurally generated mine in a distant future. The goal of the game is to extract resources, refine them and sell them on the galactic market. With the help of newly developed technology you will mine ore from a vast open world, send it to the processing station, and finally ship the metal to your home planet. You can also mine minerals and rare resources, and build cities and vehicles to improve your chances of survival. There are dangerous caves and multiple different enemies. In this project, we present our first vision of Xcross Miner & Rover, our free-to-play 3D, open world, action-packed, indie project. Play as a different species of miner and engineer and explore a huge mining world with multiple factions, friendly and hostile, and with dozens of enemies that will try to stop you. We have implemented a per-gig mining concept. For every chunk of ore you mine, you will be able to use it, refine it, sell it and use it again to further increase your progress, while mining in a procedurally generated, huge, open world. This is a project in development by RockDog Studios, a small development studio based in Poland. We aim to release the first public version of Xcross Miner & Rover in 2014.
