## Dirthead For Windows

Dirthead is a DIRECT SOURCE powered by DIRECT SOURCE 1 that offers a completely new approach to DIRECT SOURCE based guitar plugins. Its unique architecture is based on the valve amplifier DIRECT SOURCE that turned the history of DIRECT SOURCE plugins. Dirthead uses the exact same modules as the DIRECT SOURCE series, and thus we can totally ensure that the direct counterpart of every feature is also implemented by Dirthead. Dirthead takes you on a journey to create an unforgettable and powerful sound. The experienced direct sound engineer paulsvet has designed an amazing saturn engine and comes as a digital effect plugin. Dirthead offers an unlimited number of effects that create an amazing epic rock and hard rock sound with the ability to instantly use the effects as guitar pedals. Dirthead FREE is a channel with a signal path going from the signal channel to the auxiliary channels and the other way round. And although the auxiliary channels are not 100% directly connected to the DIRECT SOURCE signal path, they can be connected as a looper. FUNCTION BLOCKS The DIRTHEAD plugin features the usual function blocks. Dirthead features all the function blocks that DIRECT SOURCE has. And many more. For example you can reverse the signal with the DIRTHEAD rev function block or go the reverse direction with the DIRTHEAD rev invert function block. You can limit the duration of the reverb with the DIRTHEAD tail reverb function block and you can add reverb before the DIRTHEAD sustain function block. You can modify the bass and midrange frequencies with the DIRTHEAD bass amp and DIRTHEAD midrange function blocks and you can change the knee slope.

## What's New In Dirthead?

Outlaw VST plug-in is revolutionary in its design and concept. Using waveforms of a classical electric guitar and classic overdrive signal, this VSTi will show your listeners that classic analog sound is simply the future. Outlaw VSTi includes three channels, clean, crunch, and ultra. Each channel has three user controlled parameters that will allow you to carefully dial-in your perfect tone quickly, easily, and precisely. The Voicing knob allows the user to carefully alter tonal characteristics in seconds. Tune in and dial-in your perfect tone! Key Features: Classic overdrive, crunch and lead guitars with user selectable EQ, reverb, delay and modulation effects Voicing knob allows user to fine tune the tonal characteristics of the plugin Contains both mono and stereo VST input/output capability Compatible with both Mac and Windows VSTi pluginsThe UK has been embroiled in a political scandal since both the Conservative and Labour parties breached the UK's domestic data security laws over the past year. (Source: Reuters) The UK is in the early stages of a technological revolution that could significantly alter the way we consume our news and communicate with one another. Virtual reality headsets, 3D printed telephones and AI-powered news aggregators could soon make reading the news or checking social media entirely obsolete. The UK is in the early stages of a technological revolution that could significantly alter the way we consume our news and communicate with one another. In the past few months, we've seen reports of Google Glass glasses being banned in America and the French government considering a ban. The threat of VR headsets taking off is already being discussed in the annual SXSW conference in Austin, Texas. Some consumer analysts believe we could already be entering a Golden Age of VR, with companies like Facebook spending billions of dollars on virtual reality. A short trip to Berlin's annual international media conference, Mediascope, showed an increasing interest from UK tech companies and investment firms in VR startups. The government has even formed a digital tech investment unit to encourage innovation. "I think it's the beginning of the beginning of a shift to a new ecosystem of control that will diminish the influence of the newspapers and television," Andreas Kalogeropoulos, co-founder of VR industry interest group UKVR infos, said at Mediascope. "I think we will see a shift from TV to VR and from newspapers to web-based content." This kind
