An enigmatic woman? A hidden city? A city with a man who can see the future? A city that was ruled by a secret organization? A mysterious organization that can control the future? An organization headed by a mysterious man who can control the future? A girl who can control the future? These questions exist in the Land Between. A large country that is inhabited by a mysterious civilization. It is a country in which all the mysteries exist in one city. Edo, a country that was dominated by a war. It was destroyed and the people who lived in Edo have scattered. The threat of the Nobility who dominated Edo at that time has long since faded away, but the city is no longer safe from the Nobility. Even after the Land Between appeared, the Nobility still existed. The people who escaped from Edo lived in the Land Between and continued their lives. A sacred city and forbidden country The Land Between is

The Best Selling Game of last year

"Ars Academica" of Oxygen Not Included was a game that caught the attention of the general populous worldwide.

The game is available on the Google Play Store and steam. Through the Steam Catalogue, Ars Academica managed to outsell the best selling game of all time, Minecraft. Unreal Tournament is the number 3, but these are all just minor details compared to the game?s overwhelming success.

Oxygen Not Included is a new fantasy game where you control the crew of an old rusty spaceship.

Featuring a beautiful 2.5D engine and a beautiful depiction of an old space ship, Oxygen Not Included is an absolute joy to see and play.

Around 80.000 copies of the game have been sold. A pretty impressive number considering that the game is released in a highly competitive area with many other games competing for the market.
