Each player movement, tackle and on-ball action is analysed and used to create a "technical layer," which is then applied to the physics of the player to make him or her more realistic and responsive. FIFA also captures all the virtual camera angles for a realistic feel, and fine-tuned its match engine to not only mix between these angles, but also incorporate "God's eye view" for an accurate shot. This allows users to experience a unique football match experience, where they can see the whole match from any angle. Developer Mode was also added in FIFA 22, allowing users to tune each element of the game to their preferred settings. They can also view clips of matches, view player analysis, and play the developers' preferred position-by-position matchups. HyperMotion Technology "With the addition of new in-game technology, we have been able to deliver a deeper, more immersive experience for our players," said Alex "Big Head" Atienza, Manager of Studio Soccer, SEGA of America. "With our new 3D visual engine and enhanced real player likeness, we are now able to capture and provide players with everything they need to unleash their potential." Motion Capture Accurate player animations are becoming a vital aspect of player performance, allowing players to move with a higher level of realism. With the recent release of NHL 19, EA Sports recognized the importance of motion capture and enabled it for NHL players. FIFA 22 also introduces a motion capture controlled engine in which players can be controlled via motion-control, allowing users to experience a new, unprecedented level of artificial intelligence in player control. FIFA 22 Highlights Enhanced Player Intelligence AI has been heavily evolved in FIFA 22, providing players with far greater intelligence and awareness of the ever-changing flow of the game, as well as their teammates, opponents and teammates. AI players are intelligent and can recognize patterns, while not being influenced by the crowd noise or other distracting elements. FIFA 22 Highlights New GOALKEEPER Engine and Responsiveness FIFA 22 introduces "HyperMotion Technology" which uses motion capture data collected from 22 real-life players playing a complete, high-intensity football match in motion capture suits. The data collected from player movements, tackles, aerial duels and on-ball actions is used to power FIFA 22 gameplay. FIFA also captures all the virtual camera angles for a realistic feel, and fine-tuned

FIFA is the world's biggest sports videogame franchise. It's played by fans of all ages and abilities, wherever in the world they are. The core game mechanics that fans can enjoy in FIFA are the actions and decisions of soccer players on the pitch and all the action off the pitch. These include gathering information about your opponents, scouting ahead, finding and taking advantage of spaces in the opposition's defence, getting into the right position to receive the ball, and hitting accurate passes. This detailed and nuanced approach is what gives FIFA its unique gameplay and emotional depth. But it's not just about playing the game. You can use all the big and little decisions you make in FIFA to create your own brand of football, and win friendlies and real-life matches in a variety of game modes. In addition, online play brings EA SPORTS FIFA closer to what it feels like to actually play football. With the updated friendlies and numerous new features, FIFA Season Journey modes and other improvements, this is the ultimate experience of the game. Multiplayer - Control your team on the pitch, through a series of fresh new modes such as the ability to dribble your player through a defender or play a one-v-one with a defender. Enjoy all the classic modes, including the upcoming FIFA Ultimate Team head to head.

New Features - New to the FIFA franchise is a wide variety of features, including Fan Rivals, new creativity controls, Training Mode, New Stadia, New Goal Keepers and Targeting, the Pre-Match Engine to create action out of the blue with situations, the Kit Database to Customise your clubs look, New Stadios, Friendly and Game Modes, New Training Tools, New License Plates, Ball Physics, New Game Engine, New Player Ratings, Ratings System, Customizable Kits, New Gestures, New Auto Pass System, New Body Dimensions, as well as an all-new animation set, 20 new stadiums, and the Ultimate Team experience.

Player Ratings - All the players in the game, including stars of the past, the superstars of the present, and the future stars who are featured in FIFA 22 are rated according to their attributes and abilities. Analyse the ratings of the top players, and take the tactical approach to improve your team by putting players who score goals and assist, or players who control the midfield and attack in their right position on the pitch, and aiming to get your team into the best positions throughout the match. The body dimensions of players are also now customizable, allowing you to change the size of a players gloves, cleats, arms, legs, and head. This is achieved by selecting "tailoring" in the FIFA 22 Guide Menu, and choosing what you want to customise on the player models.

New Training Tools - Training is now enhanced with more realistic training environments, as the player is given realistic feedback when they execute the correct drills and get everything right. The training tools now also show how much time is left for a player to complete the drill, and include other new tools such as providing more detailed information about the drill and players, including showing the player's progress. The new training mode can be accessed from anywhere in the Career mode or added to in Custom Teams.

What's new:

- **Added 3-point shooting controls to Modern Mentality mode.**
- **Added glimpse mode to paperdoll.**
- **New tracking animations to become an attacking player.**
- **Fixed an issue affecting Precision Passing controls.**
- **Fixed an issue where ball could be thrown unnaturally high into the air.**
- **Fixed an issue where the players flashed on the pitch during Coaches Interaction mode.**
