With the introduction of new motions and intuitive controls, players can demonstrate movement on the pitch and change direction faster than ever. The result of this new technology is a game that is more responsive and realistic on the PlayStation 4 and PC. Along with a new Hybrid Broadcast System that streams matches to televisions, it is the most authentically powered football experience on the market. Key features: Unlock the full potential of your players The leading players in the world of football continue to improve their already high-performance abilities in the technical areas: sprint, acceleration, sprinting speed, dribbling, crossing, shooting, power and more. For the first time, you can unlock the full potential of your players' skills by customizing your squad to create players with unique and personalized characteristics. Differentiate your play The game makes it easier than ever to create and customize your fantasy team, with more new and innovative features. You can now assign player ratings to any style of player and vice-versa - for example, if you want quick, direct balls into the box from a right-wing or back into the box from a left-wing. No need to choose between speed and power - you can assign a 5 (low) to a defenseman or a 2 (high) to a striker. High ratings will increase the player's ability on the ball, while low ratings will increase the amount of control they have. Innovative player controls New controls provide easier and more realistic play, responding more quickly to the actions of the player in front of you. These changes include: A new dynamic control scheme for easier and more realistic play. A new left-right control for the left stick, which allows for increased speed and agility in several actions. New and more intuitive controls for dribbling and shooting. New control concepts for balls into the box, including the addition of a left/right control for the crossbar and easier access to the top left and right corners. New control concepts for aerial duels and holding the ball. A new combination control action for duels and dribbling, to go with the new dribbling and shooting controls. Introducing "Target Positioning," which helps you track your opponent in the heat of a game. When the red reticule on the players faces turns red, there is a high likelihood your opponent is standing directly over your target position.

### **Fifa 22 Features Key:**

- **Capture the Feeling of Real-Life Moves** - the new and improved engine captures every movement of a player's foot during a match, from first touch to finishing, and uses it to deliver authentic-feeling moves such as cross and chip shots, through balls, flicks and cuts;
- **Real Passing Combinations** - if the ball is played in back, then the third pass will always be to the feet of the player who just passed the ball;
- **Customise the Pitch** - make your pitches unique; go for elite playing styles, authentic stadiums, unique goalkeepers, training modes, and much more. How will your stadium evolve throughout your game?
- **Create Control** - Customise tactical formations, substitutions and tactics on the fly; utilise

Build your dream squad by purchasing FIFA Points using real world money or unlocked through gameplay. With authentic Team of the Year players, FIFA Ultimate Team offers deeper gameplay and a wider variety of cards than ever before. In FUT you'll be able to take your favourite clubs and players on a global journey and earn trophies along the way. And with Draft kits, trading cards, Squad Battles and more, there's a whole world of content to dive into. Online Seasons - Play Seasons with club and country online - Experience more of what's been added to the game with the addition of online Seasons. To play a season you must choose to create a player or club. It is perfectly possible to create a squad that is not present in the player setup. No need for a player to have the same name as a club - teams can be made up from any club players, as long as the player is in the squad. MY PLAYER MODE Live the life of a top player in a more immersive way, on and off the pitch, through the My Player mode. Develop your player from youngster to seasoned pro, rise through the ranks of the game and take your favourite club to the top of the world, in a multitude of distinct game modes. CLUB GAME MODE Live out your dream as a manager. Construct your team in free-roam matches, in which you have full decision-making power, or take a manager's role against AI opponents in official FIFA competitions. Either way, Teammate Ball Control allows you to dictate play through physical and mental challenges and improve your attacking and defending skills. COMPETITION MODE Test your skills as a player and create new goals and assists in either a 1v1 or 3v3 confrontation. Score a goal or create an assist for your teammates by using the ball as often as you can. The club training mode allows players to work with their teammates on their own skills, as well as their fitness, tactics and mental attributes. It is possible to cut off the match in the Training mode and complete it as a simulation. This gives a lot of insight into how a player of that position would train. Once the player has reached a certain level of fitness and intensity, the player is sent to the Real Life Match mode. A training session before the match can be also defined. Real Life Match is essentially an exhibition match featuring the player. His/her performance will be scrutinised and commented
