But before we get into the list, let's have a closer look at this guide on how to free up space on your PC. How to free up space on your PC The most obvious way of freeing up space on a Windows PC would be to optimize your storage. However, sometimes you really don't need extra storage. You can delete files, empty the recycle bin, or get rid of temporary files to free up space. You can also clear up space with the Delete Old History menu option in the Internet Explorer 11 settings. But if you've still got valuable and valuable data stored on your PC, there are some things you can do to free up more space. For example, you can get rid of unnecessary font files, login history, and program settings. You can also free up space on your hard drive by deleting old Windows updates, closing down unnecessary programs, and clearing up temporary files. Now that you're all set up with these tricks, let's get down to the best space-saving applications on Windows. 1. WinDirStat There is an extremely low limit on how much storage you can add to your PC, but there's no need to suffer from this. WinDirStat is an excellent solution to help you out here, with many useful and useful tools. With the built-in file system analyzer, you'll be able to view and sort data about your hard drive on a large, clean and visually appealing interface. The app supports many file systems, and the default file view is an excellent overview of all the available data on your PC. The app also lets you see unused space inside the file system, as well as folders and file names. The most noteworthy feature is probably the app's ability to view the
