## **What's new in Immortal Life Of Confucius:**

**in geology with John R. Howes Instead of trying to put all of the great things into words, here are some videos by the author of this Blog, you can find them on the very energetic John R. Howes sites. Dogs and cats in Geology: Seaquakes and The cosmos is always filled with playful motion: and not merely the cosmic kaleidoscope of galaxies. There are self-organizing systems. For example, as I walked in the snow that morning, I was surprised to find the patterns changing with each step. They formed something that wasn't quite a straight line, not quite a curve, but definitely a striking visual phenomenon. The grass and the trees were also seeming to move, perhaps in a more metaphysical way, perhaps only in my mind. Bio I got interested in volcanoes during my freshman year of college (1989). As a freshman, I had two electives: geology and history. I chose geology, and let me tell you, it was disappointing. The geology course was not well-integrated with the other science courses. Unlike my geology major now, I had real geology courses. The rest of the sequence was a string of social studies courses. I passed all my geology courses, but I really wasn't terribly interested in geology. My first choice had been history with a minor in geology. When I came home for the summers, my father spoke to my mother of how she had studied geology for her undergraduate degree, and that she now had a lovely hobby that didn't take time from family life and went on vacations with her daughters. I was fairly content to do similar things. However, when I returned to college for the second year, I enrolled in**

**science for the first time and chose geology. By now I was exploring my interest further, reading widely about volcanoes. I joined a geology club and took an interdisciplinary geology course—not just geology, but also physics, mathematical logic, history, philosophy and religion. I spent more time with the geology department because it was better integrated with the other science courses. I became very interested in volcanism on planet Earth, and especially plate tectonics. I read about plate tectonics, from John Clapham'**

Eaten Alive is a Point and Click Adventure game with Permadeath. Set in a post apocalypse Boston, the player will experience the city for the first time from a survivor's point of view. The game features many original locations to explore, unique puzzles and a wide array of survivor's encounters. The player will have to make important choices to survive and try to get out alive. There is a cool feature called the Central Room. Some rooms in the game are "derived" from that room. Some puzzles and zombie encounters that make you think hard! It's a prequel to the game The Dealer. Have fun! About this Game T-Shirt: Real Boston or City of Darkness? Wear this funny T-Shirt and show off your real Boston or City of Darkness spirit.
