
Interface Ba2 ((INSTALL))

The William James INTERFACE Referral Service, offered through our Freedman Center, is a mental health and wellness referral Helpline available Monday through Friday, 9 am-5 pm, at 888-244-6843 (toll free). This is a free, confidential referral service for residents of participating communities. Callers from these participating communities are matched with licensed mental health providers from our extensive database, on average, within 2 weeks of their call to INTERFACE. Each referral best meets the location, insurance, and specialty needs of the caller.

a, Cryo-EM maps of the Omicron BA.2 and BA.1 spike protein-hACE2 complex with one RBD in up conformation at 4.4 and 4.5 resolution, respectively (a). The three protomers are colored in purple, red, and green, respectively, and the density for hACE2 is colored in coral. b, Cryo-EM map of the BA.1 spike protein-hACE2 complex with two RBDs in up conformation at 4.6 resolution (b). The three protomers are colored in purple, red, and green, respectively, and the density for hACE2 is colored in coral. c, d Zoomed-in view of the interface interactions between the RBDs in the monomeric state of the two viruses. Hydrogen bonds are shown in dashed line and the polar interactions in dotted line. In panel c, the site of the protomer B is labeled. In panel d, the sites of protomer B and protomer C are labeled. e, Interaction network between the RBDs in the monomeric state of the two viruses. The polar interactions and hydrogen bonds are shown in red and dashed line, respectively. In panel e, the site of the protomer B is labeled. f, Interaction network between the RBDs in the dimeric state of the two viruses. The polar interactions and hydrogen bonds are shown in red and dashed line, respectively. In panel f, the site of the protomer A is labeled.
