## Lounge Lizard EP V4.3.1 AU AAX VST RTAS STANDALONE WIN OSX

The sheer number of controls and settings on this plugin is impressive. But, it's easy to see why, because this plugin is very comprehensive and covers just about everything an acoustic instrument can produce. There is even a handy piano roll view for fine-tuning your sounds. Unlike some other DAWs, Lounge Lizard will not show each parameter name in your list of controls, which makes it much more convenient to use. But there are two major drawbacks to this plugin. First, I find that it's very slow when generating sounds, especially when the tempo picks up. Second, while it's very flexible in terms of taking the sounds it makes, it's difficult to adjust the complexity of a sound to a traditional piano roll arrangement. For most acoustic instruments, this plugin will be ideal, but I wouldn't recommend it for instruments with complex sounds, which are harder to control. Finally, the sound engine is based on the FXpansion library, so you'll get that trademark FXpansion sound. Even though it's the state-of-the-art, it's no different than most of the other acoustic plugins on the market. Any way you cut it, the Lounge Lizard Session delivers the absolute best-sounding virtual acoustic instruments on the market. The product is sturdy, easy to use, and straightforward to master. Combine all of this with the fact that Lounge Lizard delivers all of these features at a budget-friendly price, and it's easy to see why this plugin has become one of Toontrack's best sellers. When you need to mix a full brass section with all the tone, modulation, and articulation you can possibly get out of brass instruments, you need to check out Lounge Lizard. So many instruments in one DAW.
