. I need to set up a smtp linux server with PowerMTA v4.5.. \$23.. + interspire custom or OemPRO or mailwizz (ISP rules,Â . DC SenderPro 1.6 Update Oempro Description: DC SenderPro is a customizable, email marketing software that can help people build email marketing campaigns. Requirements: PHP 5.3 or higher, MySQL DBMS, web server running PHP, DOM X-SSI Enabled, SMTP for MX configuration, POP, IMAP or Active. As a standalone app, DC SenderPro is designed for clients who want to track email address, domains, and all email generated by their clients. At the same time, is scalable to any email marketing requirements, which is an ideal. When you import the subscriber list into DC SenderPro, it will detect their email addresses and automatically creates the contact and sub record for each email recipient. It also can check MX records and add the list into all account. Features:.. All features are available in technical support.. Keyword driven emailing programs: Manage your email campaigns with 100% free email marketing tools.. Also work with newsgroups and social networks.. Non-reciprocal mailing lists: Automatically create new mailing lists based on multiple fields.. 3015 Social media integration: Integrate with facebook and twitter accounts.. Import from CSV, MS Excel, Notepad, Word.. Email bulk merchands: Send one or more campaigns in one shot.. Get feedback from your clients.. Email tracking: Track email opens.. Any data import: No more importing SisIDB data.. Use your own domains: Can run on any..
