SYMANTEC\_PCANYWHERE\_CORPORATE\_EDITION\_v12.5.0.442-DVTiSO.txt.: Symantec pcAnywhere Corporate Edition v12.5.0.442. Q: Which nation had the highest per capita GDP in 2011? I have a list of all countries ranked by per capita GDP (in 2011 dollars) in the world. I'm particularly interested in the top 5 countries in that list, as they

represent the poorest nations in the world. Which of those 5 countries was the richest, at least as measured by per capita GDP? I'll accept answers that include neighboring countries (for example, Mexico, in North America, or the Philippines, in Asia) as well. A: Source is World Development Indicators, data from 2011. The richest countries are in Africa, with Angola coming top, with a GDP per capita of about \$6,500. (Much of that is due to oil.) Among the five richest countries, two are microstates, Liechtenstein with \$988,700 and Singapore with \$1,958,000. Singapore does not actually have a per capita GDP, but its per capita GDP is \$30,238. Some other countries with high per capita GDP: United States: \$46,706 Nigeria: \$12,322 China: \$10,539 Argentina: \$10,500 Australia: \$10 f988f36e3a
