## Uninstall License Manager Ansys !NEW!

So, I think I have to perform the "remove" command But if I do that, I have a lot of errors I cannot uninstall the FLEXnet License Server as shown in this image. How to get out of this? A: ANSYS has posted solutions to the error messages that you are receiving. I don't believe the fix is for the license manager itself however, there is a package that exists that is a replacement for the license manager and is intended to be installed along side windows server 2008 in an isolated directory. It is called Ansys FLEXNt and can be found [HERE](#). You will need to download and install the standalone license manager. Aichi T?hoku College is a private junior college in Moroyama, Aichi, Japan.
