I want to validate whether login user exist in user\_id column or not. But, validation is applied in all pages. So, It should be applied when user logged in to his account. How to achieve this? A: First, make sure you have global setup in your \_ViewStart.cshtml: @{ ViewBag.Title = "Page title"; Layout = "~/Views/Shared/\_Layout.cshtml"; String validationCode = ViewData["ValidationCode"]!= null? ViewData["ValidationCode"].ToString() : string.Empty; } Then, create a custom ViewData provider in your Application\_OnAuthenticateRequest() method: protected override void OnAuthenticateRequest(HttpContext context) { // If the user session isn't valid 1cdb36666d
