------------------ "The Moon is infected! The Moon is infested with evil! The Moon is not a safe place. The Moon is dangerous. Destroy the Moon and be free!" You are a spaceship sent out to explore the caves on the moon. Explore. Explore. Explore. But once you enter the caves, you find out that they are inhabited by hostile forces. It is up to you to survive against them while also trying to find the path down to the next level of the caves. It is time for you to leave the safety of your starfighter. It is time for you to go deep into the Moon's caves. Controls: * Arrow Keys - Move Spacebar - Shoot Requirements: ----------------- * Windows 7 Download links: ---------------- Win-Installer (.zip) Demos (Including source code): ------------------------- For Windows 7 Only Demo videos: ------------- Demo video credits: ----------------- Images: ------ Images: *Moon *Level01 *Level02 *Level03 Changelog: --------- * Jun 24 2017 - initial release Q: How to do a string replace and remove a space between words (also removing any blank lines) I have some code that will do some searching and replace with some keywords. The issue is that we have some old code with the values for the replace part in the code that I am not able to update. The value for the code where is replaced is where a blank line would be expected and the replacement code is where a blank line is not expected. Is there a way to remove the blank lines from the code that I can use in my replace function to force the blank line to not be found and therefore remove it? I have looked at a number of Stack Overflow posts on this issue (see links below) but I am still not able to get it to work. How can I fix this function? string.replace(/%{0,1}/g,'%')

Jigsaw Puzzle Pack - Pixel Puzzles Ultimate: Shipwrecks (April-2022)

Anken, T731 BR9: Jump Gate, D4-1503: Fuel Containers, F7-0458: Station Core, CJD-8415: BellTower and CZJ-2045: Medical Team 1 and 2.Framed Sheet of Paper: "Don't Forget to Chose the Right Decoy" (Before CZJ-2045's Intro Quest)Follow CZJ on Facebook :CZJ-2045's script is a homage to Shenmue, which I admire greatly. For a while, I tried to write a novel that would take place in an alternate timeline with Shenmue, except I found out that it was very hard to make a self-contained story work that could keep up with Shenmue's. I decided that the only real way to do this would be to work with an existing system, so I started working on a game I called Shenmue. I made the default setting for Shenmue 1, and the tutorial. The character art, script and gameplay were all ready for Shenmue 2. However, I realized that I had no idea how to finish the game. In particular, I did not know how to make Shenmue 2 the kind of game that could compete with the other RPGs of the time. And so I put Shenmue aside and decided that I would take the only other option that I had available to me: I would develop a new game. I would attempt to make a fun, competent RPG. I would make one more stab at writing a story that would work in its own right, and then I would go back and finish Shenmue. This is what I call Shenmue: Isle of Secrets. Isle of Secrets is a fan-made Shenmue action-RPG game. It is a 3D action RPG game that has various action moves, weapons and characters. Each character has their own style and traits. While the player performs actions and attacks, dialogue and text scrolls will appear. The player will be able to choose dialogue options and move the story along in different ways. You will be able to choose all characters and access all dialogue options. NOTE: The download contains the full 3D model game and no actual game data. We have provided detailed instructions on how to import and play the game in Steam in the readme file. Please

& Ruins Free indie puzzle game with a unique format. Millions of pieces are automatically generated. More difficult puzzles can be generated as in-app purchases. Game of the year selection by Google Play! Features Challenging puzzles. There are no pre-made puzzles here. Millions of pieces automatically generated. Pieces are dropped randomly in the game board. Endless puzzles is a game without in-app purchases and it's a premium IAP. New Titles Selection The Game of the Year title is now awarded to the best titles recommended by Google Play. Biggest corporate profits ever in US; CEO pay remains woefully low - draq ====== mdorazio I know this will probably get a downvote, but how seriously should I take this ? Why would big companies be "saving" all that money? Because it gives them a nice tax writeoff to the shareholders, or have they (largely successfully) used this money to weather the recession and now are starting to actually make profit instead of just breaking even? I'm

honestly not sure. ~~~ xen2xen1 They just deduct their quarterly profits like usual. And pay their executive team ridiculous sums of money. ------ tonyedgecombe You can't go far without running into obscene pay for executives. Compare it to London where most of the big
