More info at: Behavior of Double Proton Transfer in a Coordinate-Rigid and 1-Methylindole-Containing Supramolecular Complex. The contribution of the 1-methylindole fragment to the structural and dynamical behavior of a supramolecular complex formed by the 1:1 association of p-xylylene diimide (XYLi) and

dimethylpyrrolidine (DMPy) is described. The complex exhibits an inherent photochemical asymmetry in its DMPy and 1-methyindole domains, in which the respective domains have different responses to light-induced proton transfer. The results suggest that, while DMPy is a double proton acceptor, 1-methyindole is a double proton donor. These conclusions are discussed in light of both experimental and theoretical data. {

COMMENTS Great news BUT, won't the balance between

premium pack and single player be different from what is for BF3? I know I'll be getting be BF4 but I hope they give us DLC packs as a free to play experience =D I really hope there are a lot more BF4 DLC releases, as I always turn into a huge imperial cop when I play BF3. I want more for BF4 so I hope they'll release more BF4 DLCs. So everybody will be eligible of getting most weapons for BF4 where as they couldn't get the premium in BF3, for rest of the world. How on earth did people who didn't even play BF3 get there and play 14000 comments in minutes??? I wonder if BF4 is going to
