That's not to say that the game is completely without character. There are a couple of humorous cutscenes. A wacky tennis sequence and what appears to be a recurring joke from Diamonds Are Forever (Gunn is being tortured with his throat being cut, only for James Bond to shoot him out of the window and tie his ropes to the drainpipe before he lands). Who does NightFire let off the leash, then? The closest it gets to a Bond villain is a CIA black-ops terrorist who makes a pass at Bond's girlfriend at the start of the game, and Bond can only return a single punch. Even the primary enemy, Drake, is a victim of science, who manages to mind-control two of his henchmen by plugging their ears with wax. There are only three villains, and they're all men, so it doesn't detract from Bond's role as the Man-With-The-Glass-Rings much. There is only one boss fight, and it's puzzle-based, which gives the game an odd air of excitement and anticipation. This feeling is a by-product of the controls. Unlike most FPSs, which make Bond more powerful the more skilled he is, NightFire is exactly the opposite. It allows Bond to explode into a perfect frenzy of bullets if he gets into a run-away battle, but the effect lasts for only a fraction of a second. This means that he will be hit far more often than usual, but even more importantly it means that you have to be extremely precise when taking out Bond's opponents. There is no way to slow down time, only one button allowing you to switch between run/melee/stun/unblock. That restricts your ability to dodge. It also makes navigation a real breeze, and as you progress through the game, it seems like you're moving through the single screen, rather than the tiny room.

The word that comes to mind when I think of Nightfire is repeatable. It's ok if you don't like the levels, but there is not much to do between them, and the missions can be completed in a number of different ways. The AI that guards the humans in the laboratory is pretty bad. It's not only that you have to jump over low fences, but it also doesn't shoot at the player. The guards that roam the streets do so in a strange fashion, that reminds me of a dog that runs into a wall and hits its head on every three steps. Also, there is a lot of shooting at the player. You can fire quite a lot of bullets at the humans without worrying about getting hit. Aiming your weapon for a better shot can be tricky, since there is no target-lock. Blasting away with the press of the trigger is a thing of the past, because you have to slow down for the human to fall down. In fact, even when you see the human running, it can be difficult to get a hit. Shooting a single bullet down the middle of a body is not always effective. The girl with a machine gun can easily take out half the game's characters. Neither the camera or the environment emphasise how, in comparison to the films, the games are on the adult side. Which, in a game about James Bond, is a bit odd. The back story tells us more than is revealed about the castle, but James Bond is again given only a vague backstory, which will be explained in-game. This means the game has to rely on the Bond formula: there are no visible emotions, and the story is told through references to past events and scenery. By the way, if the mission design in the game feels like Bond, that's because it is. 5ec8ef588b
