KeyMacro converts Mac text files to Unicode Text Encoding Format (UTF-8) so it can be viewed on Windows, Linux, and other systems. KEYMACRO is a reliable text format conversion software that can convert Mac text files to Unicode Text Encoding Format (UTF-8) so it can be viewed on Windows, Linux, and other systems. It comes with a good set of basic functions, such as to convert between Mac text, HTML, and Rich Text Format, and to create a WordPerfect file from a Mac text file. KeyMacro works on the concept of 'Extract' and 'Restore', which means that it can create a file by extracting the

information from an original file, then store this file as a new one. The conversion process is quite intuitive to use. Users just have to browse and choose a text file on Mac OS X, then click the 'Convert' button to convert the file into a new format that can be used on different platforms. KEYMACRO is a reliable text format conversion software that can convert Mac text files to Unicode Text Encoding Format (UTF-8) so it can be viewed on Windows, Linux, and other systems. It comes with a good set of basic functions, such as to convert between Mac text, HTML, and Rich Text Format, and to create a WordPerfect file from a Mac text file.
