Where it all began, is nothing short of a massive, mountain-sized hole. Every so often, it opens up and swallows someone. Most people think they're going crazy and that something is influencing them, but those rumors are just a myth. People are simply too chicken to approach that mouth of nothingness, and would run away before they've even seen it. That is, until one brave man decided to confront it. Game System 4STORY - ORIGIN: 4Story is a skirmishing free game with a heavy focus on the original tabletop concept, where you'll be fighting enemies of different sizes, classes and races.The world of 4Story is made for explorations There are no dungeons, monsters or leveling up. So, there is only one world, and it's for everyone to explore.Fighting is done on the field. The world is not made by invisible walls, so there is no defense blocking you from the enemy at any moment. While the world is supposed to be open, there are still plenty of battles and content to be found.Organized PvP The two sides of the war, Defugel and Craxion, have plenty of battles and competitions going on. In fact, it is just another way to improve your character. Either a duel or a clan fight with other guilds, PvP is always up for grabs!Fights are held in several different types of locations. 2 of them are the main cities - Defugel and Craxion. Each city is full of guilds and war factions that will fight each other to the end. This system was designed to give all players (including the support units) an opportunity to get together and fight. There are three different types of battles in 4Story: the war, no-contest fights and battles between guilds. The war is a battle fought between two or more guilds that are seeking a major objective. These are the most likely to be fought. A war is won or lost depending on how many players in each guild show up. Since the guilds can be freely chosen, a guild can enter a war and then refuse to continue if there aren't enough players. The no contest fights are very different and aren't PvP. The purpose is just for a guild to practice its abilities or improve its attacks. The guild battles are the only battles that require two guilds. They are special because it's possible for two different guilds to face off against each other with two different alliances on both

G (Europe, Asia, Oceania & Africa) Get access to all versions! Intuitive search filters help you to find exactly what you are looking for and bring up a nicely sorted list. Easy navigation makes it easy and convenient to find all the Mega Packs you need. You can even disable with one click a specific version from showing up. It is probably the most efficient and most used Mega Pack manager on the internet. What is a Mega Pack? A Mega Pack is a collection of six of each map. The article is not about best loadouts. It is about getting as many mega packs as possible to get you started in the best and most efficient way you can. Or this could also work for best loadouts. An option to turn off specific maps is accessible from the first tab. The first option “On” indicates that the map will be available. You can select maps which you don't need from the first tab. The second tab gives you the option to select whether the listed map is to be included or not included. You see the # of maps to use, next to each map. Underneath the labels for each map is an "On Off" toggle that will make that map active or inactivate. What maps will be covered here? Q: Looking to re-acquire the guild prior to 20th Aug 2017 I have disbanded in real life for a while.I am wanting to re-acquire the guild prior to 20th Aug 2017. A: Eventually a few members of the guild managed to reach a moderator who was able to facilitate communication between the two, so I've been invited to rejoin the guild and am currently in the midst of creating a new account. The trade alliance & guild board are expected to be available in the next two weeks, but no too soon for me. In the meantime, my old tradepals still have orders, which I'm pursuing, and yes they still need people to drop jo'boats and I'm considering them if my other things seem to slow in requests. using System.Reflection; using System.Resources; using System.Runtime.CompilerServices; using System.Runtime.InteropServices; using System.Windows; // General information about an assembly is controlled through the following // set of attributes.
