Cara Menghilangkan Windows License Is Expired Build 9200 27 !!HOT!!

I want to delete the expired builds but it says "You are now a better person than I am because you have x and I have x" when you tap on the builds. Once you have your desired builds select them (not the expired builds) on the right hand side of the app then click back and it says "We're no longer friends" I am not a better person. Iol. Thats the way it is. Thank you for not posting nothing Help!!! I cannot install the update because it says my Windows license for that app is expired. I have this exact situation with 7 different apps. I didn't even know about the app. So I bought apps from the iTunes store and I cannot get them to install. I really need help. Thanks. I'm still having the same problem. My password hasn't changed since I've activated the apps. I don't remember entering them. I just wanted to change the password so I thought I should change it. I'll be able to install the update after that. As of now I'm confused on how to change the license. If you want to activate Windows with the previous license, there are two ways to activate your Windows PC as well as activate the new license of your computer. You can download the program Activation License Meter and activate your Windows PC. The other way is to activate your Windows after updating it using Windows Activation Center. As early as possible, activate your PC with the old license, and then activate it again with the new license. Why? Because the Windows key cannot automatically be activated again after a reset or expired license. That is, when you activate your Windows, it is by default activated for one year. It does not know that the license has expired and it cannot be activated.
