**CAD-KAS PDF Flip Pages Download For PC**

CAD-KAS PDF Flip Pages Crack Free Download is a professional application designed to enable you to create the flip page effects for PDF files. No need for a PDF reader to view the document. It will display directly in the web browser. The user has buttons to go to the next page, the previous page or to the first or last page. The user can also decide to enter the page number into an edit field. If he leaves the field the document

will show up on the page entered. The user can also click on a page to turn the page. If he moves over the page the edge of the paper will roll up as if the page will be turned. There are also zoom buttons to zoom the document in and out. The best thing is, that this takes only a small piece of plain HTML code on your website, no flash or something else. You can insert the HTML code anywhere. The pages will be stored as jpg images. This program allows you to open any PDF document and

export as flip page website with a few clicks. It will also allow you to edit the PDF file before you export it (it can do so because it is based on our PDF Editor application). CAD-KAS is the best program that turns any PDF file into a cool flip book for free. It can turn any PDF documents into flip pages. There are two tabs to select pages for flipping: first you select the pages that you want and then second you just press the button to flip the page. You can select more than one page, and you can also choose the "smooth" or "zoom" view. If you leave the field, then the document will appear on that

page. If you want to go to the first or last page, then you can type the page number, or the program will automatically select the page you click on. If you don't want to have a printed copy of the document, you can open a new window and just save the document as a PDF file. If you want to save a PDF document as a JPEG file, then you can choose the destination folder and click Save. This program is a very useful tool for webmasters. Key Features: • Support for any PDF files, including the 2.0 and

3.0 PDF standard • PDF flip page like web page • The user can select pages of any PDF document • Can open a PDF document into multiple pages, can be used to export as a flip book • Can flip any pages of a PDF document by specifying a page number or if you leave the field, the document will appear on that page • The user can zoom the document into or out • The user can select the "zoom" or "smooth" view • Can go to the first or last page of a PDF file by typing in the page number or

clicking on the left or right arrows • The user can open the document as a new window • The user can select the destination folder • Allows you to add text and images to the PDF document • Allows you to add a digital signature to the PDF file • Allows you to save the PDF file as a JPEG document • Allows you to create a PDF reader application for your website that opens PDF files into a window and use flip pages effect on the website • The user can import a PDF file into the

application and save it as a flip book • The user can print the document as a PDF file or as a JPEG file • Allows you to set a date and time in the PDF file • Allows you to set a custom watermark on the PDF document • Allows you to control whether the user can print
