When you have an Adobe ID, you can use Cloud Apps to get software and Creative Cloud subscription features quickly and easily. For more about the types of Cloud Apps available, see <https://www.adobe.com/creativecloud/index.html> . You can browse and install apps from the Adobe website, and the Cloud Apps link on your account home page will show you the apps youve installed. Adobe recommends installing updates frequently, particularly during the first 30 days of use to ensure that any apps youve installed are working correctly. As a good practice, it is advisable to have the latest software version installed when you first install Adobe software. The Creative Cloud apps are designed to work together seamlessly, so youll always have the latest versions of the software, tools, and services that matter to you most. And they always come with Adobes standard and most popular new features and updates, plus a growing arsenal of free apps, tools, and services available with the Creative Cloud all for no additional cost. When you launch an Adobe Creative Cloud desktop app like Illustrator or Photoshop, youll find the new features, updates, and fixes right there on your Mac or PC. But the CC apps arent always the newest Adobe updates; sometimes there are updates to the apps that dont get pushed out automatically, like fixes for bugs or other issues. Thats why version control is a great way to always have the latest software. Just as with the CC desktop apps, you can rollback to an earlier version to bring back older software or fix any problems. Every Creative Cloud subscription is a standalone license for a single product which is tied to your Adobe ID. When you install apps for the first time, youll be asked to agree to additional terms of use and the Adobe Privacy Policy.
