I'm practicing Python and I want to make some program. I'm interested in an easy method of generating random numbers in the specified range. For example: range(0,30) I need to write a code to randomly generate numbers from the specified range, say from 2 to 5. I can think of things like: Use numpy.random to generate random numbers. Generate a list in advance and then generate a random index from that list. Is there any simpler method? A: from numpy import random def random_range(lower, upper): nums = random.randint(lower, upper, size=upper - lower + 1) if (nums >= upper): print('greater than the range') return return nums A: import random r=random.randint(a,b) Where aQ: Dynamic Fetching of Images in Android I have developed an application in which, I 6d1f23a050
