With the decline of the student council system, a new student council system is formed in Europe to combat all King's mess, where they will get help from the public through the efficient administration, and hope that this generation of students will end up avoiding the course to rule and focusing on the education themselves. Notes: - The original writer's opinion about Japan is that Japan is run like a feudal country. We end up catching his real opinions instead as for his reasons were based on a real life situation, so there's one vague point. - The Christian/Catholic point of view is added in with Chang Chien Kei's point of view as Chang Chien Kei is probably the one who most supports the Catholic point of view in "Hidden Bastion". - This manga is very anti-authority, they circumvent all systems and do their part for democracy. Chang Chien Kei is a genius, Taiki is a hero, both of them are viewed in the system are regarded as criminals. - Futari wa Pretty Cure is supposed to be supporting episodes, but this is confusing. Also I am not sure why a book is being distributed, as they use the nouveau libre technology in the student's move. - The author said the photos of each of the protagonists are not her and the writer's point of view is that they haven't seen each of them yet as they haven't finished reading the manga. If this is wrong, I am sorry, as I want to know what

**Dots n Lines (Dots and Boxes) game is a classic and old school game brought you by Lighthouse Studio Europe. The game starts with an empty grid of dots. Usually two players take turns adding a single horizontal or vertical line between two unjoined adjacent dots. A player who completes the fourth side of a 1x1 box earns one point and takes another turn. (A point is typically recorded by placing a mark that identifies the player in the box, such as an initial.) The game ends when no more lines can be placed. The winner is the player with the most points. Features: - Single Player Mode (Against Computer) - Two Player Mode - Different grids (5x5, 6x6, etc.) - Very fun to play with your friend. - Nice graphics and sounds. Show More... Ask HN: Pricing your own SaaS? - potshot Hey there. I have a SaaS that I am about to launch. It is fairly simple but the tricky part is a question some users might ask: how much will it cost? What's your experience? ===== josephpmay It really depends on how well your product is built, and the amount of work it's going to take for your users to figure out how to use it. If it's a very simple tool that an end user can understand quickly (e.g. Dropbox or Popcorn Time), then there's really no need to state a price until it's launched, and even then it's really just for aesthetics. However, if it's going to be a more complicated tool (e.g. Trello), then you might want to figure out a price early on in order to have a ballpark figure of how much users will pay. Of course, you'll have to test that number by giving out tickets to customers. Personally, when I'm creating a SaaS, I ask myself questions about the price and what it's going to cost to launch and build, etc. But if the answers to those questions are pretty obvious, you could just figure it out**
