A: This probably comes down to declaring your function as a class method; @omz is right about that. Either keep your current function a class method, remove the function declarations from your local-level source file, or do both of the following. class Hello { } @Hello.foo def foo() { print "Hello, world!" } This will produce the same result. However, it's generally a good idea to keep class methods in class (namespaced) source code files; declaring them in a local file means they're not available to classes in that file. Q: Where does the 12.04 64bit install go? I'm seeing conflicting answers here about where the default Ubuntu install goes. I had a working 13.04 system installed in SSD, then the thought occurred to me to try the 64bit version - however, I can't remember where the installer is defaulting to. I only have 1 other 64bit PC (XP) on this network, but that PC doesn't have a burner etc, so installing on it is a dead-end - and, since the SSD died anyway, I'm downgrading to the 32bit version. Can anyone shed some light please? A: In the current LTS version, there is no default install location for the 64 bit installer (at least that I know of). If you want, you can install the 64 bit version in a default partition. During installation you will be given the choice to do this. A: After downloading the 64bit iso and burning it to a cd, insert it into your computer and boot up. When you get to the menu, go to advanced, and you will be able to choose an install location. I believe the default is to install 64 bit, as well. Local state-deferral for all Washington patients with a 10-15% 10-year risk of sudden cardiac death or aborted sudden cardiac arrest in need of pacemaker or defibrillator implantation We are currently unable to accept Cigna contracts outside of Washington state. The program is currently only available to eligible Medicare beneficiaries in Washington state. Insurance Companies currently participating in the program include: Medicare: Medicare Parts A & B Blue Cross, Blue Shield of Washington Washington State Blue Cross and Blue Shield Monica

We appreciate your support through a payment above the minimum by making a donation to the Wellcome Trust, a charitable organisation that supports the research in medicine. I'll be the first to admit that I've been on the Skipton-like diet for nearly three years now and it's entirely possible I'm more hooked on the 'I'm eating really healthy' mentality than I am hooked on the superfood diet. naser od gazimestana do haga i nazad pdf downloadCompanies and individuals signing up to the Supercharging economy have come up with a solution to the problem of charging their cars in Australia. A sunny day in Sydney is a classic Australian experience. Image by Boris Brekalo/Shutterstock. There are some wonderful things about this country, and they've been enumerated in many insightful and many lighthearted ways, often during heated electoral debate. One of the most important bits of evidence we, as a country, keep putting on show is that Australia is awash with ute-sporting and ute-driving loonies. Our 1980s hang-glider suits are the second most iconic thing about us - rivalling the low-rise white dwelling; even the Frogg and Scam albums are more national treasure than most nations would claim - and it's the only country on earth whose people hate their cars. So, as a new season of the ute seat belt clamp-a-thon draws to a close, with drivers reporting endless aching backs and what could be the most arbitrary time period in the solar system, businesses and individuals alike have come up with a solution to the problem of charging their cars in Australia. The car charging station in Coburg. Image by Jan Oldenbaan/Shutterstock. There are many reasons why our cars are used less than the cars of nations who own bigger economies and barely ever enjoy relief from the heat. The problem has been heavily chronicled throughout the ute-driving population since the second world war, but it's only now that businesses are coming up with creative and substantive solutions to this self-inflicted problem.
