DrumTrack is a drum pattern creation software for creating cool drum tracks. How does it work? You start up the application with a single loop and are able to create multiple patterns. Every pattern is represented with its corresponding instrument and it's placed in a measure. Each measure has its own tempo which can be changed with the press of a button. If a loop is to be used several times, it can be setup as a loop track which can be used by pressing the loop button. If more than one loop is to be used, it can be setup as a track and all loops used can be selected. When a loop or track is used it can be muted or soloed and when the loop or track is placed in a new measure all previous songs are saved, and the newly placed song is placed in the old place and the new song is placed in the new place. Track 3 is a variation on Track 2, so make sure you keep track of your own sequence in the event of an error. Drum Track Control Starting DrumTrack 3 - Step 1: Select the blank loop/track by using the mouse wheel and clicking on the loop. Press the arrow keys to select the loop. Then Press Enter to start the track. Changing the track 4 - The track can be changed. To change it, click the loop and press Enter. Then press either Arrow Left or Arrow Right to select the track you want to use. Then press Enter to select it. Looping a track 5 - The loop can be played by clicking on the loop button. Play a pattern 6 - The pattern can be played by clicking the play button. Saving a track 7 - To save a track, click the play button. Then select Save. Press Enter to save the track. Working with patterns Changing values 8 - In the Pattern Properties window, you can change the values for different instruments and patterns./* * @license * Copyright Google LLC All Rights Reserved. * * Use of this source code is governed by an MIT-style license that can be * found in the LICENSE file at */ import {JitCompiler} from '@angular/compiler'; import {Platform, PlatformProvider} from '@angular/cdk/platform'; import {Component, Input, NgModule}
