Create a design-proof, complete mockup of your CAD drawing in Inventor. Use Microsoft Word to create an electronic version of a drawing or your presentation with text, line art, and dimensions. Use it as a discussion starter in your design meetings. Switch between two instances of AutoCAD at the same time and follow the same or different file paths. (video: 1:00 min.) Automatically sync drawings while you're on the move. Work on files at one location and import them later, when you're back at your computer. (video: 1:30 min.) Change the way you interact with information in AutoCAD. Use the rich Omnidirectional Staircase editing technology that's intuitive and easily accessible with the Motion pen. Add layers of shading to 2D drawings and 3D models. Extend the same shading layer to multiple drawing areas. Save a copy of your drawing and view it at any time.
