Fix SAFE OS Phase Error During Replicate OC Operation Error !FREE!

[Download](#)

Recently, users have been reporting an error: "SAFE_OS phase failed during . NET assembly". I tried several things but it didn't work. I have a project that I created in Visual Studio 2017 on Windows 10. I can't get it to work in Visual Studio 2017. Here is a screenshot. I can't get all links to work properly. I can't run build. I also can't debug. I can't find a way to add an error message, or just somehow find why the build isn't working. I also tried various fixes but to no avail.

Fix SAFE OS Phase Error During Replicate OC Operation Error
