CH9200 USB ETHERNET DRIVER

CH9200 DRIVER CH9200 DRIVER UBUNTU CH9200 DRIVER FOR WINDOWS 8 CH9200 DRIVER ON WINDOWS A: I don't know about an Ethernet adapter, but I know how to share internet connection via USB. I have tried it once, when I bought my new laptop I had exactly this problem, where I don't even know USB ports, so I got myself a USB Ethernet Adapter from a local store. It worked until I had to uninstall the PC it was installed on. When I plugged it in again on my new PC, it wouldn't work. But, after researching online, I found out that the Windows USB drivers were not installed correctly on my new PC. So, I updated the USB drivers on my new PC (which had another Ethernet Adapter), and that got my PC to work perfectly. A: There's no 8X9 100Base-T Dual Port Plug & Play Ethernet LAN Adapter Adapter for Windows available. The only driver for the device available from the device manufacturer is for Windows 2000. The only possible solution would be a generic Ethernet controller PCI-E compatible, like the Silverscient RS-232 Ethernet Adapter that we carry in stock. A: First make sure that you are using the correct driver for your device. Second, it is possible the device has a problem with the LED panel. There is a sticky post with a printer that has a similar issue. This is solved by the user who posted it finding a replacement LED panel and nothing more. : 0; top: 0; z-index: 2; } .jcrop-demo2-dots { display: block; position: absolute;

CH9200 USB ETHERNET DRIVER
