“Artists are on the forefront of digital creativity and find new ways to express themselves every day,” said Meggan Kueper, vice president of Photoshop, Adobe. “We’re thrilled to innovate on Photoshop to enhance its workflow, making it easier than ever to create at the highest resolution, and to bring the collaborative experience of Photoshop editing to life.” **Adobe Photoshop Elements** - For those looking to design great imagery — print and digital — for websites, social media, marketing materials or any other purpose, the new version of Photoshop Elements will be jumping with new and improved tools to help you do your job better. The powerhouse app makes important improvements to fill and outline tools, layout, layers, palettes, albums, masking and more. Also, new design tools allow you to add your logo to shapes, format text or apply common Photoshop techniques. Possibly the toughest challenge for anyone looking to create high-resolution images is figuring out which tool you should be using. The new “Make Fill” option lets you create uniform, seamless fills of any color or gradient by picking an expertly selected color or gradient from the Subject Color Controls. “We added new features for designers to prioritise while having to juggle other things like production and client support,” says Ines Erdres, Senior Director at Adobe, “The number of users moving to the cloud and mobile devices has increased exponentially. Now we are seeing more and more designers leveraging Photoshop to support those use cases, and we’ve enhanced the experience to improve their workflow.”
